## PLANT BULBS NOW FOR LOVELY FLOWERS NEXT SPRING

Our stock of Holland grown bulbs is ready for immediate planting. Please note in this folder we are listing several classes of tulips. Darwins always have been, and probably always will be, the most popular class, but we suggest a trial of some of the others. There are many interesting and showy varieties well worth space in the flower garden. Generally, all tulip classes listed except Double Early and Single Early and tall growing and may be planted together. The Double and Single Early are best used as a border.

ALL PRICES PREPAID
